Period fo	The MAILING DATE of this communication app or Reply	ears on the cover sheet with the c	orrespondence address			
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.  - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.  - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.  - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### **DETAILED ACTION**

## Response to Amendment

The amendment filed on 10/7/09 has been considered.

Claim 1 is pending.

#### Information Disclosure Statement

The IDS filed 10/21/09 and 11/23/09 have been considered and initialed copies of the PTO-1449s are enclosed.

### Response to Arguments

## Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

The factual inquiries set forth in *Graham* v. *John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

- 1. Determining the scope and contents of the prior art.
- 2. Ascertaining the differences between the prior art and the claims at issue.
- 3. Resolving the level of ordinary skill in the pertinent art.

Art Unit: 1643

4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claim 1 remains rejected under 35 U.S.C. 103(a) as being unpatentable over EP 1371664 in view of Di Modugno et al J. Immunotherapr vol. 20 p. 431 (1997). The reasons for this rejection are of record in the paper mailed 4/7/09.

Applicant argues that a comparison of 48 monomer has higher affinity that the 48 dimer and same with the 789 monomer/dimer. While applicant characterizes this figure has showing lower affinity for the dimmer, the reference clearly states otherwise. Applicant is directed to page 434, first column last line before "Discussion". This sentences states "...in this group the monomer and the dimmer, as in the 48 group, did not show significant differences" (emphasis added). Furthermore, the abstract clearly states at line 15+ that "[w]e found that monomers and their homodimers, lined by a disulfide bridge bond, bind to HLA-A2.1 molecules with overlapping affinity." (emphasis added). Applicant is also directed to the title of the article. Applicant is also

directed to page 435, first column, line 5+. Thus, those of ordinary skill in the art (ie the authors of the reference) clearly do not agree with applicant's assessement.

Applicant further cites Parkhurst to show the independence of binding to HLA antigen and CTL inducing activity. The Parkhurst reference was published before any of the reference cited in the rejection and therefore the current reference more clearly define the state of the art. Furthermore, page 435 first column last 3 paragraph discuss the the data and the role of the cysteine "in the generation of different conformational structures that could be recognized by the immune system as non-self components." Thus, there is a reasonable expectation of success in the generation of an increased immune response.

Applicant again argues surprising results and refers to the previously submitted declaration. Applicant specifically argues that the unexpected results are that the CTL induced by this peptide homodimer is "cross-reactive with the natural type peptide monomer and is highly state compared to the monomer in blood". These were not the Examiner's motive for combining the references and since these are product claims, the Examiner's motive for combining the references stands since applicant has not provided arguments against this. Additionally, for a proper showing of unexpected results, the product of the instant invention needs to be compared to the closest prior art and this has not been done.

#### Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Application/Control Number: 10/541,821 Page 5

Art Unit: 1643

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sheela J. Huff whose telephone number is 571-272-0834. The examiner can normally be reached on Monday-Thursday 6am to 2pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Larry Helms can be reached on 571-272-0832. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
